SUMMARY

Frontend Engineering Leader with **6+ years** of experience building scalable React and React Native platforms. Currently leading frontend engineering for a multi-tenant InsurTech ecosystem serving **9M+ users** across **12 insurance** organizations. Skilled in frontend architecture, platform scalability, performance optimization, and team leadership, with experience managing engineers, mentoring talent, and delivering enterprise-grade solutions from concept to production.

KEY ACHIEVEMENTS

- Built and scaled a multi-tenant InsurTech platform serving **9M+ users** across brokers, insurers, employers, and employees.
- Progressed from Founding React Developer → Senior ReactJS Developer → Sr. Lead Engineer, leading frontend engineering growth over 6+ years.
- Expanded the frontend engineering team from **3 to 9 developers**, mentoring engineers into senior and leadership roles.
- Delivered 300+ business modules across insurance, employee benefits, wellness, and claims management ecosystems.
- Led major platform modernization initiatives, including React 16 → React 18 migration and Create React App → Vite migration.
- Successfully **onboarded 12 insurance organizations**, enabling scalable growth through configuration-driven and multi-tenant architecture.

WORK EXPERIENCE

Sr. Lead Engineer- Frontend, FynTune Solution Private Limited

Jan 2026 – Present

- Lead frontend engineering for a large-scale multi-tenant InsurTech platform serving 9M+ users across brokers, insurers, employers, and employees.
- Own frontend architecture, technical strategy, engineering standards, and delivery execution for a platform comprising 300+ business modules, 500+ routes, and 12 insurance organizations.
- Manage and mentor a team of 9 React engineers, driving sprint planning, technical design, code quality, release management, and engineering best practices.
- Spearheaded the onboarding of insurer partners by defining architectural boundaries and separating broker and insurer applications into independent repositories, improving scalability and maintainability.
- Led key platform modernization initiatives, including CRA to Vite migration, bundle optimization through lazy loading and React Suspense, image optimization, and adoption of automated testing practices.
- Enhanced the configuration-driven multi-tenant architecture, enabling rapid onboarding of new brokers and insurers with minimal custom development effort.
- Partner closely with product leaders, business stakeholders, and enterprise clients to translate complex insurance workflows into scalable, configurable digital solutions.
- Contribute to organizational growth through technical interviewing, hiring, mentoring, and career development of frontend engineers.

Senior ReactJS Developer, FynTune Solution Private Limited

Jan 2023 – Dec 2025

- Promoted to Senior ReactJS Developer to lead frontend delivery, mentor engineers, and drive product expansion initiatives for enterprise insurance clients.
- Expanded the frontend team from 4 to 6 engineers, providing technical mentorship, conducting code reviews, and fostering ownership-driven development practices.
- Collaborated closely with enterprise clients, product teams, and leadership to gather requirements, demonstrate product capabilities, and deliver solutions aligned with business objectives.

- Led technical discussions and product demonstrations with senior stakeholders, including CEOs, CTOs, and department heads of enterprise organizations.
- Successfully onboarded multiple insurance brokers and enhanced platform capabilities to support diverse insurance and employee benefits workflows.
- Delivered 180+ business modules across key domains, including RFQ and plan management, E-Cashless claim journeys, TPA portals, aviation-specific insurance solutions, and flexible employee enrollment experiences.
- Integrated multiple third-party services, including payment gateways, wellness platforms, and TPAs, to extend platform capabilities and improve user experience.
- Owned delivery and stakeholder management for multiple enterprise accounts, managing requirement analysis, production support, incident resolution, and client communication.
- Led critical modernization initiatives, including the migration from React 16 to React 18, dependency upgrades, and major React Router modernization efforts.
- Contributed to team growth through technical interviewing, candidate evaluation, and hiring support.

React Developer, FynTune Solution Private Limited

Jun 2020 – Dec 2022

- Joined as one of the founding frontend engineers and played a key role in building a digital employee benefits and insurance platform from the ground up.
- Contributed to core frontend architecture, product development, and production rollout as part of a 3-member engineering team.
- Delivered 80+ business modules that became the foundation of the platform, covering claims management, policy administration, employee enrollment, wellness programs, hospital discovery, and operational workflows.
- Designed and implemented configuration-driven solutions that enabled platform scalability while minimizing client-specific customizations.
- Successfully delivered the first enterprise client onboarding and contributed to platform stability, scalability, and adoption across multiple organizations.
- Led the development and release of React Native mobile applications, launching employee-facing apps on both the Apple App Store and Google Play Store.
- Delivered new insurance offerings, including Cyber Insurance and Travel Insurance, and led a team of 3 engineers to launch the Travel Insurance platform within three months.
- Collaborated closely with backend engineers, product teams, and business stakeholders to deliver enterprise-grade solutions and accelerate product growth.
- Represented the engineering team in product demonstrations and client discussions, helping bridge technical and business requirements.
- Maintained delivery excellence while coordinating distributed teams in a fully remote environment during the pandemic.

EDUCATION

Bachelor of Engineering

University of Mumbai | 2015–2019

- Electrical and Telecommunication Engineering.

KEY SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, Material UI

Architecture: Frontend Architecture, Multi-Tenant Systems, Configuration-Driven Platforms, Scalable UI Design, Component Architecture

Performance: Code Splitting, Lazy Loading, Bundle Optimization, Image Optimization, Vite Migration

Leadership: Engineering Leadership, Team Management, Technical Mentoring, Hiring & Interviewing, Stakeholder Management, Release Planning

Delivery: Agile Development, Enterprise Client Engagement, Production Support, Cross-Functional Collaboration

Tooling: Vite, Git, NPM, REST APIs
